

Automated Cleaning Solution

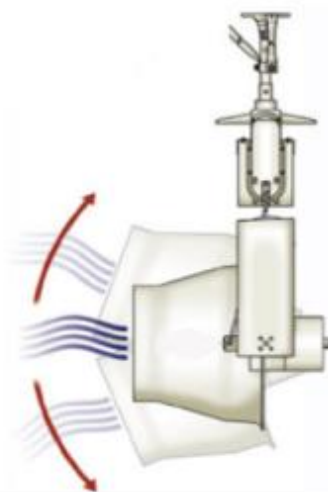

The Jetstream Aire was developed to provide an automated cleaning solution for Industrial Buildings. The Jetstream Aire is mounted in the roof and rotates to clear high and low level dust and lint in those hard to reach areas.

With its patented oscillating technology just one Jetstream Aire is able to clear a radius of 15m of Dust and Lint. With regular use of the Jetstream Aire further dust and lint build up is prevented.

- Reduces Fire Risk
- Thorough High and Low Level Cleaning
- Better Air Quality and Circulation
- Reduces Cleaning Costs

360° Rotation

Swings 160°
Up and Down

With a very fast ROI the Jetstream Aire is widely adopted in

- Industrial Laundries
- Bakeries
- Flour Mills
- Tissue and Paper Manufacturers
- General Manufacturers
